## SEMI - ANNUAL INDEX

July - December 1955

Volume 176

### Readership Research

THE IRON AGE retains The Mills Shepard Organization to make a continuing study of its readership. This is done by a field force which interviews readers who hold various positions in many different types of companies. These detailed reports help keep us abreast of reader interest. They tell us what readers like or dislike; what subjects they would like to see emphasized; and they help us to improve the appearance of the magazine. In short, they are part of our effort to make THE IRON AGE more valuable to the reader.
